About Epsco

EPSCO was originally established in the early 1990's within the UK to supply the needs of the Water Industry with particular emphasis on compliance with new E.U. directives relating to bacteriological control in public water supplies.

Using the knowledge developed within the Water Industry our range of services have been expanded and developed to take in a diverse range of Industrial clients.

Naturally occurring deposits form in process systems that adversely affects performance, EPSCO's speciality is in removing these deposits using a variety of unique/patented (patent applied for) chemical applications and purpose built equipment.

Our starting point for all treatment process is that they are non intrusive and cause no or minimum interruption to production, are completely effective whilst causing no environmental impact and can be employed to ensure the highest standards of safety.

Our people are specifically recruited and trained to meet and exceed our clients expectations in terms of delivering a first class fully effective service.

As a Company we instill core values based on open and honest communication, integrity and responsibility.

Quality Policy
Health & Safety Policy
Environmental Policy

We have operational bases in the UK, Ireland and Norway with specialist offshore related facilities in Denmark and Holland.
